

Prepress Checklist

Have you...

- Provide the latest composite, separated, laser proof or mock-up?
- Checked that all graphics, images, logos etc., are included?
(Crown Press will not be responsible for resolution quality or color reproduction of any embedded files)
- Checked that all images, graphics etc., are properly placed and linked?
- Used Postscript or Truetype fonts?
- Included all the screen and printer fonts used in project for both text and graphics?
(example: "Times Bold" instead of "Times" with bold applied)
- Set up the files to bleed properly (.125" on all sides that bleed)?
- Checked that all spot colors are clearly named and applied correctly?
- Made sure that all spot colors are named the same across all application platforms?
- Checked that all supporting images are high resolution, at least 300 dpi?
(Images with resolution less than 300 dpi are considered low resolution and Crown Press will not be responsible for the poor quality as a result of printing)
- Checked that all black text is 100% black, and is not a build of CMYK?
- Deleted all unused colors and unused items in your project?
- Created Files in applications supported by Crown Press?
- Checked spelling, punctuation and grammar?

We would be glad to help you if you have any problems or questions regarding these procedures. For quotes and general questions please e-mail or call your sales representative or call 602-437-4444 for assistance.

We can also provide technical assistance for files being provided to Crown Press.
